KVK : Warangal (Mamnoor)
Date : 26.07.2023 (Wednesday)
Title : “Diagnostic visit to sheep and goat farm”
Venue : Kila warangal, Warangal
Activity : Diagnostic visit to sheep and goat farm

Activities:

- Checked health condition of animals and observed few animals coughing and sneezing which indicates animals are suffering with Pneumonia which prevails mostly in rainy season and few with Foot rot disease.
- History collected from the farmer reveals that animals were taken outside for grazing, feed availability is less, as the farm is located far away he is facing problem for treating the animals.
- Advised the farmers to give Pencillin (2 ml after dilution, Intramuscular), Melonex (0.8 ml, Intramuscular), Avil injections (0.8 ml, Intramuscular) for 3 days and Breetheez powder (10 gram once in daily for 7 days),
- Antiseptic foot clean with 1 % Potassium Permanganate and Charmil cream as external antibiotic application for 7 days.
- Advised to provide deworming medications, maintain hygiene conditions in shed, proper drainage channel and to avoid overcrowding of animals.

Participants & No: Farmers & 2
