ICAR-ATARI, ZONE-X, HYDERABAD

**KVK** : KVK Namakkal.

**Date** : 04.07.2024

**Title** : Impact study of Assessing the performance of Cassava Mealy bug Parasitoids, *Anagyrus lopezi* in tapioca with NBAIR Scientist's Bangalore.

**Venue** : Rasipuram and Mulukurichi villages of Namakkal district.

## Activity:

After releasing the Parasitoids, we have Assessed the performance of Parasitoids in Tapioca. The mealy bug incidence was very low, and the top portion of the stem growth was very good.

Followed by diagnostic field visit on mealy bug incidence field and released the parasitoids in Tapioca field.

During the occasion our Directorate Extensions Education, TANUVAS has discussed about the status of mealy bug and it's Parasitoids in Namakkal district with NBAIR, Scientist's Bangalore (Dr.Mohan and Dr.Sampath Kumar) along with KVK Scientists.

**Staff involved:** Scientists (Plant protection, Agronomy) & Professor and Head.
