KVK : TNAU KVK SALEM

DATE : 26/11/2024

TITLE : Diagnostic Field Visit to Paddy Nursery

VENUE : Kajalnaickanpatti

ACTIVITY :

Sunlight scorching was observed in the pro tray paddy nursery.

Recommendations offered:

1. Increasing the frequency of water spray during high temperature.
2. Avoiding direct placing of pro trays on the cement floor.
3. Providing partial shade initially and also during hot Sunny hours.
4. Providing sand bed below the pro trays and gunny bags between the pro trays.

Staff Involved: SMS (SS&AC)
